Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 1 recites among other things: determining based on a data return parameter in a user profile, the data return parameter including at least a parameter that indicates whether to deliver the results immediately or at a latter time when the results become available; collecting portions of the results in a memory if the results are delivered to be at a latter time; and delivering results to the communication device. Regarding this limitation, there is no antecedent basis for the word "results".

The same situation exists in independent claim 8.
